Ms. Elizabeth A. Brown  
Remedial Project Manager  
U.S. Environmental Protection Agency  
345 Courtland Street  
Atlanta, Georgia 30365

Dear Ms. Brown:

The U.S. Fish and Wildlife Service has reviewed the Draft Feasibility Study Report for the Carrier Air Conditioning (Collierville) Superfund Site. We have the following comments.

The report appears to be very complete in its description of the contaminant problem and the alternative techniques evaluated for relieving it. Based on the information provided, we anticipate no significant ecological impacts from the implementation of any of the alternatives described. The recommendation of Alternative 3 as the selected alternative appears to be sound, as it would relieve the source of the contamination in the shortest time commensurate with reasonable cost, and would minimize the energy consumption associated with the clean-up operation.

We appreciate the opportunity to comment. If you have further questions, please contact Mark Wilson or Robert Willis of my staff.

Sincerely,

*Douglas B. Winford*

Douglas B. Winford  
Acting Field Supervisor
